Subject: DASS Waste Disposal Completion Report
20160830 DASS WC Disposal Report-Final.pdf

Good Afternoon,

Please find attached a completion report documenting the waste characterization and disposal activities performed at the Diamond Alkali Superfund Site (DASS) during December 2015, and March 2016. The report describes disposal activities which occurred during two separate disposal events and included waste from the following projects.

- DASS (OU-1) groundwater treatment system operations
- Newark Bay Study Area- Sediment Quality Triad/Porewater
- Combined Sewer Overflow/Stormwater Outfall Investigation
- Phase II Removal Action

Hard copies are being mailed out as well. Please let me know if you have any questions,

Thanks

Brian Mikucki
